## Analysing Families: Morality and Rationality in Policy and Practice

While the family and its role continues to be a key topic in social and government policy, much of the literature is concerned with describing the dramatic changes that are taking place. By contrast, *Analysing Families* directly addresses the social processes responsible for these changes - how social policy interacts with what families actually do. Topics covered include:

- \* the relationship between morality and rationality in the family context
- \* the variety of contemporary family forms
- \* the purposes and assumptions of government interventions in family life
- \* the relationship between different welfare states and different ideas about motherhood
- \* 'Third Way' thinking on families
- \* divorce and post-divorce arrangements
- \* lone parenthood and step-parenting
- \* the decision to have children
- \* the economic approach to understanding family process
- \* the legitimacy of state intervention in family life.

With contributions from the UK, and North America, *Analysing Families* provides the framework within which to understand an increasingly important element in social policy.
