Electromagnetic Fields and Waves in Fractional Dimensional Space (SpringerBriefs in Applied Sciences and Technology) Muhammad Zubair, Muhammad Junaid Mughal, Qaisar Abbas Naqvi

This book presents the concept of fractional dimensional space applied to the use of electromagnetic fields and waves. It provides demonstrates the advantages in studying the behavior of electromagnetic fields and waves in fractal media.

The book presents novel fractional space generalization of the differential electromagnetic equations is provided as well as a new form of vector differential operators is formulated in fractional space. Using these modified vector differential operators, the classical Maxwell's electromagnetic equations are worked out. The Laplace's, Poisson's and Helmholtz's equations in fractional space are derived by using modified vector differential operators.

From reader reviews:

Jean Young:

Why don't make it to become your habit? Right now, try to prepare your time to do the important act, like looking for your favorite reserve and reading a e-book. Beside you can solve your short lived problem; you can add your knowledge by the book entitled Electromagnetic Fields and Waves in Fractional Dimensional Space (SpringerBriefs in Applied Sciences and Technology). Try to stumble through book Electromagnetic Fields and Waves in Fractional Dimensional Space (SpringerBriefs in Applied Sciences and Technology) as your close friend. It means that it can being your friend when you really feel alone and beside that course make you smarter than ever before. Yeah, it is very fortunated for you personally. The book makes you a lot more confidence because you can know every little thing by the book. So , let us make new experience and knowledge with this book.

Ruby Martinez:

Now a day folks who Living in the era exactly where everything reachable by interact with the internet and the resources in it can be true or not demand people to be aware of each facts they get. How many people to be smart in having any information nowadays? Of course the reply is reading a book. Reading through a book can help individuals out of this uncertainty Information mainly this Electromagnetic Fields and Waves in Fractional Dimensional Space (SpringerBriefs in Applied Sciences and Technology) book because this book offers you rich data and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you probably know this.

Lillian Kea:

Information is provisions for folks to get better life, information presently can get by anyone from everywhere. The information can be a understanding or any news even a problem. What people must be consider while those information which is inside former life are hard to be find than now's taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All of those possibilities will not happen inside you if you take Electromagnetic Fields and Waves in Fractional Dimensional Space (SpringerBriefs in Applied Sciences and Technology) as the daily resource information.

Kenneth Armstrong:

That reserve can make you to feel relax. This specific book Electromagnetic Fields and Waves in Fractional Dimensional Space (SpringerBriefs in Applied Sciences and Technology) was colourful and of course has pictures around. As we know that book Electromagnetic Fields and Waves in Fractional Dimensional Space (SpringerBriefs in Applied Sciences and Technology) has many kinds or type. Start from kids until young adults. For example Naruto or Detective Conan you can read and believe you are the character on there.

Therefore not all of books are usually made to bore you, any that offers you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading which.
