In Pursuit of Nanoethics: 10 (The International Library of Ethics, Law and Technology)

In Pursuit of Nanoethics: 10 (The International Library of Ethics, Law and Technology)

The volume contributes to the ongoing nanoethics debate in four topical areas. The first part tackles questions of what could be called 'meta-nanoethics'. Its focus lies on basic concepts and the issue of what - if anything - is truly novel and special about the new field of nanoethics or its subject matter. The second part of this volume presents a selection of interesting perspectives on some of the opportunities and challenges of nanotechnology. Part three takes a more in depth look at one of the most pressing current concerns: how to deal with the risks and uncertainties surrounding nanotechnology in a responsible manner. In its fourth and final part the volume touches on issues of public debate and policy.
