MEMS Product Engineering: Handling the Diversity of an Emerging Technology. Best Practices for Cooperative Development Dirk Ortloff, Thilo Schmidt, Kai Hahn, Tomasz Bieniek, Grzegorz Janczyk, Rainer Brück

This book provides the methodological background to directing cooperative product engineering projects in a micro and nanotechnology setting. The methodology is based on well-established methods like PRINCE2 and StageGate, which are supplemented by best practices that can be individually tailored to the actual nature and size of the project at hand. This book is intended for everyone who takes an active role in either practical product engineering or in teaching it. This includes project and product management staff and program management offices in companies working on innovation projects, those active in innovation, as well as professors and students in engineering and management.
