The topics of World War II and US-China relationship have been of much interest to academics and general public alike. This book challenges the conventional wisdom that has been produced on the topics over the past 50 years and offers the readers a new and balanced treatment of the topics. The scope of this book covers all the major political-military events from the Pearl Harbor attack in December 1941 to the victory over Japan in August 1945.

The scholarship in this subject area has long suffered from one serious flaw, i.e., unbalanced treatment. Although the leading works in the English language have aspired to conform to high professional standards, their intrinsic limitation is that they have only consulted English language materials, but have virtually failed to consult Chinese language materials. This phenomenon is unsatisfactory since wartime US-China alliance was a highly complicated "bilateral" relationship which can only be adequately narrated and analyzed by taking into account both countries' data and perspectives. This book addresses this glaring deficiency by employing a large amount of original Chinese source materials, but also by discovering a considerable amount of new English language materials as well as subjecting other often-used English materials to a close scrutiny.

This book enables the readers to take a completely fresh look at that important period of US-China relations.
