**Process Synthesis for Fuel Ethanol Production (Biotechnology and Bioprocessing)** C.A. Cardona, O.J. Sanchez, L.F. Gutierrez

Process engineering can potentially provide the means to develop economically viable and environmentally friendly technologies for the production of fuel ethanol. Focusing on a key tool of process engineering, **Process Synthesis for Fuel Ethanol Production** is a comprehensive guide to the design and analysis of the most advanced technologies for fuel ethanol production from feedstocks. It describes how process systems engineering can be applied to fuel ethanol production to achieve new levels of efficiency according to technical, economic, and environmental criteria.

Drawing on the authors' more than 15 years of process engineering and ethanol research, the book first focuses on liquid biofuels, before examining the role of process synthesis in the rapid and high-tech analysis and design of complex biotechnological processes. It then describes various types of feedstocks, including sugars, starchy crops, lignocellulosic biomass, and microorganisms, as well as hydrolysis technologies, such as saccharification. The authors cover the fuel ethanol production technologies for different feedstocks, the new technological innovations based on process integration to reduce energy consumption, and the environmental issues of bioethanol production. They also discuss the technological configurations for fuel ethanol production in the industry and the possible factors affecting food security with fuel ethanol production and consumption.

Supported by case studies that include calculations and discussions of results, this book uses a process engineering approach to explore the analysis and development of fuel ethanol production from different feedstocks. It shows how accurate analysis and precise design, along with responsible government policies, can lead to fair and sustainable development of energy crops worldwide.

### **From reader reviews:**

#### **Willene Choate:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite publication and reading a guide. Beside you can solve your trouble; you can add your knowledge by the reserve entitled Process Synthesis for Fuel Ethanol Production (Biotechnology and Bioprocessing). Try to make the book Process Synthesis for Fuel Ethanol Production (Biotechnology and Bioprocessing) as your good friend. It means that it can being your friend when you really feel alone and beside regarding course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you more confidence because you can know anything by the book. So , we should make new experience along with knowledge with this book.

#### **Jeffrey Evans:**

Reading a book to be new life style in this 12 months; every people loves to learn a book. When you go through a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. If you would like get information about your study, you can read education books, but if you want to entertain yourself look for a fiction books, these us novel, comics, in addition to soon. The Process Synthesis for Fuel Ethanol Production (Biotechnology and Bioprocessing) provide you with a new experience in reading through a book.

#### **Daniel England:**

As we know that book is vital thing to add our knowledge for everything. By a book we can know everything we wish. A book is a set of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This guide Process Synthesis for Fuel Ethanol Production (Biotechnology and Bioprocessing) was filled in relation to science. Spend your extra time to add your knowledge about your scientific research competence. Some people has several feel when they reading any book. If you know how big advantage of a book, you can really feel enjoy to read a book. In the modern era like today, many ways to get book that you just wanted.

#### **Sandra Black:**

What is your hobby? Have you heard this question when you got learners? We believe that that issue was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you know that little person just like reading or as reading become their hobby. You need to understand that reading is very important and book as to be the point. Book is important thing to increase you knowledge, except your teacher or lecturer. You will find good news or update in relation to something by book. A substantial number of sorts of books that can you choose to use be your object. One of them is Process Synthesis for Fuel Ethanol Production (Biotechnology and Bioprocessing).
