## The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin (Nato Science Partnership Subseries: 2)

The irrigated area in the Aral Sea basin totals about 7.5 million hectare. Part of the water supplied to this area is consumed by the irrigated crop; the remainder of the supplied water drains to the groundwater basin, to downstream depressions, or back to the rivers. During its use, however, this drained part of the water accumulates salts and chemicals. The disposal of this polluted water causes a variety of (environmental) problems. If the percentage consumed water of the total water supply to an irrigated area (the so-called overall consumed ratio) can be increased, less water needs to be drained. This alleviates part of the related (environmental) problems. Further, if the overall consumed ratio for the above 7.5 million hectare is improved, less water needs to be diverted from the rivers. Hence, more water can flow towards the Aral Sea. As mentioned above, part of the non-consumed irrigation water drains to the groundwater basin. Commonly, the natural discharge capacity of this basin is insufficient to handle this imported water. As a result, the groundwater table rises towards the land surface causing waterlogging. In (semi-)arid zones this waterlogging triggers a soil salinity problem resulting to a significant reduction in crop yields. The artificial increase of the discharge capacity, and lowering of the groundwater table, solves the soil salinity problem.

### **From reader reviews:**

#### **Joni Griffith:**

What do you with regards to book? It is not important along with you? Or just adding material if you want something to explain what you problem? How about your spare time? Or are you busy individual? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every individual has many questions above. They have to answer that question since just their can do this. It said that about publication. Book is familiar in each person. Yes, it is suitable. Because start from on pre-school until university need this kind of The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin (Nato Science Partnership Subseries: 2) to read.

#### **Charles Trask:**

The ability that you get from The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin (Nato Science Partnership Subseries: 2) may be the more deep you searching the information that hide inside the words the more you get enthusiastic about reading it. It does not mean that this book is hard to understand but The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin (Nato Science Partnership Subseries: 2) giving you joy feeling of reading. The copy writer conveys their point in a number of way that can be understood simply by anyone who read this because the author of this publication is well-known enough. This book also makes your personal vocabulary increase well. That makes it easy to understand then can go along, both in printed or e-book style are available. We recommend you for having this specific The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin (Nato Science Partnership Subseries: 2) instantly.

#### **Leonard Vega:**

People live in this new day of lifestyle always aim to and must have the time or they will get lot of stress from both everyday life and work. So , whenever we ask do people have time, we will say absolutely sure. People is human not just a robot. Then we request again, what kind of activity are there when the spare time coming to anyone of course your answer will unlimited right. Then do you try this one, reading books. It can be your alternative throughout spending your spare time, the actual book you have read is usually The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin (Nato Science Partnership Subseries: 2).

#### **Joseph Mack:**

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book was rare? Why so many query for the book? But almost any people feel that they enjoy to get reading. Some people likes studying, not only science book but also novel and The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin (Nato Science Partnership Subseries: 2) or others sources were given

know-how for you. After you know how the good a book, you feel want to read more and more. Science publication was created for teacher or students especially. Those guides are helping them to add their knowledge. In some other case, beside science publication, any other book likes The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin (Nato Science Partnership Subseries: 2) to make your spare time more colorful. Many types of book like here.
