Frontiers of Fundamental Physics and Physics Education Research: 145 (Springer Proceedings in Physics)

In a knowledge-based society, research into fundamental physics plays a vital role not only in the enhancement of human knowledge but also in the development of new technology that affects everyday life. The international symposium series Frontiers of Fundamental Physics (FFP) regularly brings together eminent scholars and researchers working in various areas in physics to exchange expertise, ideas, results, and new research perspectives. The twelfth such symposium, FFP12, took place at the University of Udine, Italy, and covered diverse fields of research: astrophysics, high energy physics and particle physics, theoretical physics, gravitation and cosmology, condensed matter physics, statistical physics, computational physics, and mathematical physics. Importantly, it also devoted a great deal of attention to physics education research, teacher training in modern physics, and popularization of physics. The high scientific level of FFP12 was guaranteed by the careful selection made by scientific coordinators from among 250 submissions from 28 countries across the world. During the three days of the conference, nine general talks were delivered in plenary sessions, 29 invited talks were given in specific topic areas, and 59 oral presentations were made. This book presents a selection of the best contributions at FFP12 with the aim of acquainting readers with the most important recent advances in fundamental physics and in physics education and teacher development.

From reader reviews:

Rachel Robbins:

As people who live in the modest era should be up-date about what going on or information even knowledge to make them keep up with the era which can be always change and advance. Some of you maybe will probably update themselves by looking at books. It is a good choice for yourself but the problems coming to anyone is you don't know which you should start with. This Frontiers of Fundamental Physics and Physics Education Research: 145 (Springer Proceedings in Physics) is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

Dawn Dustin:

This book untitled Frontiers of Fundamental Physics and Physics Education Research: 145 (Springer Proceedings in Physics) to be one of several books that will best seller in this year, here is because when you read this e-book you can get a lot of benefit on it. You will easily to buy this kind of book in the book store or you can order it by way of online. The publisher of this book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Touch screen phone. So there is no reason for your requirements to past this e-book from your list.

Reading a book being new life style in this calendar year; every people loves to learn a book. When you go through a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your examine, you can read education books, but if you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, and also soon. The Frontiers of Fundamental Physics and Physics Education Research: 145 (Springer Proceedings in Physics) will give you new experience in studying a book.

Kenneth Copeland:

You could spend your free time to read this book this book. This Frontiers of Fundamental Physics and Physics Education Research: 145 (Springer Proceedings in Physics) is simple to bring you can read it in the park, in the beach, train as well as soon. If you did not include much space to bring typically the printed book, you can buy the actual e-book. It is make you quicker to read it. You can save the actual book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.
