Geopolitical Economy: After US Hegemony, Globalization and Empire (The Future of World Capitalism) Radhika Desai

Geopolitical Economy radically reinterprets the historical evolution of the world order, as a multi-polar world emerges from the dust of the financial and economic crisis.

Radhika Desai offers a radical critique of the theories of US hegemony, globalisation and empire which dominate academic international political economy and international relations, revealing their ideological origins in successive failed US attempts at world dominance through the dollar.

Desai revitalizes revolutionary intellectual traditions which combine class and national perspectives on ‘the relations of producing nations’. At a time of global upheavals and profound shifts in the distribution of world power, *Geopolitical Economy* forges a vivid and compelling account of the historical processes which are shaping the contemporary international order.
