## The presentation of a novel theory in orthogonal regression

The literature about neural-based algorithms is often dedicated to principal component analysis (PCA) and considers minor component analysis (MCA) a mere consequence. Breaking the mold, *Neural-Based Orthogonal Data Fitting* is the first book to start with the MCA problem and arrive at important conclusions about the PCA problem.

The book proposes several neural networks, all endowed with a complete theory that not only explains their behavior, but also compares them with the existing neural and traditional algorithms. EXIN neurons, which are of the authors' invention, are introduced, explained, and analyzed. Further, it studies the algorithms as a differential geometry problem, a dynamic problem, a stochastic problem, and a numerical problem. It demonstrates the novel aspects of its main theory, including its applications in computer vision and linear system identification. The book shows both the derivation of the TLS EXIN from the MCA EXIN and the original derivation, as well as:

- Shows TLS problems and gives a sketch of their history and applications
- Presents MCA EXIN and compares it with the other existing approaches
- Introduces the TLS EXIN neuron and the SCG and BFGS acceleration techniques and compares them with TLS GAO
- Outlines the GeTLS EXIN theory for generalizing and unifying the regression problems
- Establishes the GeMCA theory, starting with the identification of GeTLS EXIN as a generalization eigenvalue problem

In dealing with mathematical and numerical aspects of EXIN neurons, the book is mainly theoretical. All the algorithms, however, have been used in analyzing real-time problems and show accurate solutions. *Neural-Based Orthogonal Data Fitting* is useful for statisticians, applied mathematics experts, and engineers.

**From reader reviews:**

**Jose Goodell:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite reserve and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Neural-Based Orthogonal Data Fitting: The EXIN Neural Networks (Adaptive and Cognitive Dynamic Systems: Signal Processing, Learning, Communications and Control). Try to make the book Neural-Based Orthogonal Data Fitting: The EXIN Neural Networks (Adaptive and Cognitive Dynamic Systems: Signal Processing, Learning, Communications and Control) as your pal. It means that it can to become your friend when you really feel alone and beside that course make you smarter than before. Yeah, it is very fortunated for yourself. The book makes you considerably more confidence because you can know everything by the book. So , let's make new experience as well as knowledge with this book.

**Darrell Guess:**

Book is to be different for every grade. Book for children right up until adult are different content. As we know that book is very important usually. The book Neural-Based Orthogonal Data Fitting: The EXIN Neural Networks (Adaptive and Cognitive Dynamic Systems: Signal Processing, Learning, Communications and Control) ended up being making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The e-book Neural-Based Orthogonal Data Fitting: The EXIN Neural Networks (Adaptive and Cognitive Dynamic Systems: Signal Processing, Learning, Communications and Control) is not only giving you considerably more new information but also to become your friend when you really feel bored. You can spend your current spend time to read your publication. Try to make relationship with all the book Neural-Based Orthogonal Data Fitting: The EXIN Neural Networks (Adaptive and Cognitive Dynamic Systems: Signal Processing, Learning, Communications and Control). You never experience lose out for everything should you read some books.

**Gina Reiter:**

Playing with family in a very park, coming to see the water world or hanging out with buddies is thing that usually you may have done when you have spare time, subsequently why you don't try matter that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Neural-Based Orthogonal Data Fitting: The EXIN Neural Networks (Adaptive and Cognitive Dynamic Systems: Signal Processing, Learning, Communications and Control), you could enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang-out type is it? Oh can occur its mind hangout men. What? Still don't understand it, oh come on its called reading friends.

**Wesley Binns:**

What is your hobby? Have you heard in which question when you got pupils? We believe that that problem was given by teacher to their students. Many kinds of hobby, All people has different hobby. And you also know that little person including reading or as examining become their hobby. You need to know that reading is very important and also book as to be the point. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You will find good news or update concerning something by book. Different categories of books that can you decide to try be your object. One of them are these claims Neural-Based Orthogonal Data Fitting: The EXIN Neural Networks (Adaptive and Cognitive Dynamic Systems: Signal Processing, Learning, Communications and Control).
