**Algebraic Combinatorics (Undergraduate Texts in Mathematics)** Richard P. Stanley

Written by one of the foremost experts in the field, Algebraic Combinatorics is a unique undergraduate textbook that will prepare the next generation of pure and applied mathematicians. The combination of the author's extensive knowledge of combinatorics and classical and practical tools from algebra will inspire motivated students to delve deeply into the fascinating interplay between algebra and combinatorics. Readers will be able to apply their newfound knowledge to mathematical, engineering, and business models. The text is primarily intended for use in a one-semester advanced undergraduate course in algebraic combinatorics, enumerative combinatorics, or graph theory. Prerequisites include a basic knowledge of linear algebra over a field, existence of finite fields, and group theory. The topics in each chapter build on one another and include extensive problem sets as well as hints to selected exercises. Key topics include walks on graphs, cubes and the Radon transform, the Matrix–Tree Theorem, and the Sperner property. There are also three appendices on purely enumerative aspects of combinatorics related to the chapter material: the RSK algorithm, plane partitions, and the enumeration of labeled trees. Richard Stanley is currently professor of Applied Mathematics at the Massachusetts Institute of Technology. Stanley has received several awards including the George Polya Prize in applied combinatorics, the Guggenheim Fellowship, and the Leroy P. Steele Prize for mathematical exposition. Also by the author: Combinatorics and Commutative Algebra, Second Edition, © Birkhauser.

### **From reader reviews:**

#### **Ryan Donahue:**

Book is to be different for every single grade. Book for children until eventually adult are different content. As it is known to us that book is very important normally. The book Algebraic Combinatorics (Undergraduate Texts in Mathematics) has been making you to know about other information and of course you can take more information. It is extremely advantages for you. The reserve Algebraic Combinatorics (Undergraduate Texts in Mathematics) is not only giving you much more new information but also to become your friend when you experience bored. You can spend your own spend time to read your reserve. Try to make relationship with the book Algebraic Combinatorics (Undergraduate Texts in Mathematics). You never feel lose out for everything in case you read some books.

#### **Carlton Little:**

This Algebraic Combinatorics (Undergraduate Texts in Mathematics) book is absolutely not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is usually information inside this reserve incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. That Algebraic Combinatorics (Undergraduate Texts in Mathematics) without we know teach the one who studying it become critical in thinking and analyzing. Don't end up being worry Algebraic Combinatorics (Undergraduate Texts in Mathematics) can bring whenever you are and not make your handbag space or bookshelves' turn into full because you can have it in the lovely laptop even phone. This Algebraic Combinatorics (Undergraduate Texts in Mathematics) having very good arrangement in word along with layout, so you will not experience uninterested in reading.

#### **Richard Russell:**

Typically the book Algebraic Combinatorics (Undergraduate Texts in Mathematics) has a lot of knowledge on it. So when you check out this book you can get a lot of profit. The book was written by the very famous author. Mcdougal makes some research prior to write this book. This kind of book very easy to read you may get the point easily after reading this book.

#### **Alexander Goodman:**

Algebraic Combinatorics (Undergraduate Texts in Mathematics) can be one of your basic books that are good idea. All of us recommend that straight away because this guide has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining however delivering the information. The article writer giving his/her effort to place every word into satisfaction arrangement in writing Algebraic Combinatorics (Undergraduate Texts in Mathematics) yet doesn't forget the main stage, giving the reader the hottest in addition to based confirm resource info that maybe you can be one among it. This great information may drawn you into brand-new stage of crucial thinking.
