Ken E. Sigler, III, James L. Rainey

Securing an IT Organization through Governance, Risk Management, and Audit (Internal Audit and IT Audit) Ken E. Sigler, III, James L. Rainey

Past events have shed light on the vulnerability of mission-critical computer systems at highly sensitive levels. It has been demonstrated that common hackers can use tools and techniques downloaded from the Internet to attack government and commercial information systems. Although threats may come from mischief makers and pranksters, they are more likely to result from hackers working in concert for profit, hackers working under the protection of nation states, or malicious insiders.

Securing an IT Organization through Governance, Risk Management, and Audit introduces two internationally recognized bodies of knowledge: Control Objectives for Information and Related Technology (COBIT 5) from a cybersecurity perspective and the NIST Framework for Improving Critical Infrastructure Cybersecurity (CSF). Emphasizing the processes directly related to governance, risk management, and audit, the book provides details of a cybersecurity framework (CSF), mapping each of the CSF steps and activities to the methods defined in COBIT 5. This method leverages operational risk understanding in a business context, allowing the information and communications technology (ICT) organization to convert high-level enterprise goals into manageable, specific goals rather than unintegrated checklist models.

The real value of this methodology is to reduce the knowledge fog that frequently engulfs senior business management, and results in the false conclusion that overseeing security controls for information systems is not a leadership role or responsibility but a technical management task. By carefully reading, implementing, and practicing the techniques and methodologies outlined in this book, you can successfully implement a plan that increases security and lowers risk for you and your organization.

From reader reviews:

Terri Wiggins:

As people who live in the actual modest era should be up-date about what going on or facts even knowledge to make all of them keep up with the era and that is always change and move forward. Some of you maybe will probably update themselves by studying books. It is a good choice for yourself but the problems coming to an individual is you don't know which you should start with. This Securing an IT Organization through Governance, Risk Management, and Audit (Internal Audit and IT Audit) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and want in this era.

Bradley Smith:

Spent a free time for you to be fun activity to perform! A lot of people spent their leisure time with their family, or their friends. Usually they carrying out activity like watching television, planning to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Will you something different to fill your current free time/ holiday? Can be reading a book can be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the reserve untitled Securing an IT Organization through Governance, Risk Management, and Audit (Internal Audit and IT Audit) can be very good book to read. May be it is usually best activity to you.

Isabel Martin:

Playing with family inside a park, coming to see the sea world or hanging out with friends is thing that usually you may have done when you have spare time, and then why you don't try issue that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Securing an IT Organization through Governance, Risk Management, and Audit (Internal Audit and IT Audit), you are able to enjoy both. It is very good combination right, you still want to miss it? What kind of hang type is it? Oh can happen its mind hangout people. What? Still don't obtain it, oh come on its called reading friends.

Keith Mayo:

As a university student exactly feel bored in order to reading. If their teacher inquired them to go to the library or to make summary for some e-book, they are complained. Just little students that has reading's soul or real their passion. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that studying is not important, boring as well as can't see colorful pictures on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Securing an IT Organization through Governance, Risk Management, and Audit (Internal Audit and IT Audit) can make you really feel more interested to read.
