Pediatric Neuro-Ophthalmology

Michael C. Brodsky

Pediatric Neuro-Ophthalmology Michael C. Brodsky

"Due to the generous representation of the afferent visual system within the brain, neurological disease may disrupt vision as a presenting symptom or as a secondary effect of the disease. Conversely, early developmental disturbances of vision often disrupt ocular motor control systems, giving rise to complex disorders such as nystagmus, strabismus, and torticollis. The signs and symptoms of neurological disease are elusive by their very nature, presenting a confounding diagnostic challenge. Neurological medications and neurosurgical treatments can produce neuro-ophthalmological dysfunction that can be difficult to distinguish from disease progression. Affected patients may experience substantial delays in diagnosis, and are often subjected to extensive (and expensive) diagnostic testing. Scientific articles pertaining to specific disorders are scattered throughout medical subspecialty journals. These children continue to "fall through the cracks" of our medical education system. The increasing recognition that pediatric neuro-ophthalmology comprises a distinct set of diseases from those seen in adults has led to its emergence as a dedicated field of study.

"Since the original publication of Pediatric Neuro-Ophthalmology nearly fourteen years ago, interest in the field has burgeoned. Pediatric ophthalmology and pediatric neurology subspecialty conferences often include symposia dedicated to recent advances in pediatric neuro-ophthalmology. Technical advances in neuroimaging have given rise to a more integrated mechanistic classification of neuro-ophthalmological disease in children. Our understanding of neurodevelopmental disorders of the visual system has expanded, longstanding monoliths have been dissembled into component parts, basic molecular mechanisms have taken center stage, and genetic underpinnings have become definitional. Evolutionary alterations can now be observed at the level of the gene, adding a new dimension to our understanding of disease pathogenesis. New classifications now encompass clinically disparate conditions. Descriptive definitions have been supplanted by mechanistic ones, and clinical definitions superseded by genetic ones. Our concept of disease pathogenesis has been revised and in some cases overturned. Bearing witness to these remarkable advancements has compelled me to enhance and expand the first edition of Pediatric Neuro-Ophthalmology into this new and revised one.

"In the first edition of this book, our goal was to present the clinical characteristics, diagnostic evaluation, and therapeutic options for the common neuro-ophthalmologic disorders of childhood. In so doing, we designed the book to be provide a narrative journey through the thought processes involved in the clinical management of these disorders. In this edition, I have retained the basic narrative format of original book, while expanding the exploration of these complex visual disorders in the context of the many new scientific advancements and discoveries that have come to light. These conditions are fun to diagnose, fascinating to understand, and gratifying to manage." --from the *Preface to the 2nd Edition*.

From reader reviews:

David Hedges:

This Pediatric Neuro-Ophthalmology tend to be reliable for you who want to be described as a successful person, why. The key reason why of this Pediatric Neuro-Ophthalmology can be on the list of great books you must have will be giving you more than just simple reading food but feed you with information that maybe will shock your before knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed people. Beside that this Pediatric Neuro-Ophthalmology forcing you to have an enormous of experience such as rich vocabulary, giving you tryout of critical thinking that we all know it useful in your day task. So , let's have it and enjoy reading.

Maritza Berry:

The guide with title Pediatric Neuro-Ophthalmology has lot of information that you can learn it. You can get a lot of advantage after read this book. This particular book exist new understanding the information that exist in this reserve represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. This book will bring you throughout new era of the syndication. You can read the e-book on your smart phone, so you can read the idea anywhere you want.

Todd Voss:

Your reading 6th sense will not betray you, why because this Pediatric Neuro-Ophthalmology e-book written by well-known writer we are excited for well how to make book which might be understand by anyone who else read the book. Written throughout good manner for you, dripping every ideas and composing skill only for eliminate your hunger then you still skepticism Pediatric Neuro-Ophthalmology as good book not merely by the cover but also through the content. This is one e-book that can break don't judge book by its cover, so do you still needing one more sixth sense to pick this!? Oh come on your reading through sixth sense already alerted you so why you have to listening to an additional sixth sense.

Raymond Augustus:

You may get this Pediatric Neuro-Ophthalmology by look at the bookstore or Mall. Just viewing or reviewing it can to be your solve challenge if you get difficulties to your knowledge. Kinds of this book are various. Not only by means of written or printed but can you enjoy this book through e-book. In the modern era including now, you just looking of your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose right ways for you.
