Drought: Research and Science-Policy Interfacing

Drought: Research and Science-Policy Interfacing

Droughts occur in arid and semi-arid areas of the world, but also in humid areas, and can develop over short periods (flash drought) or longer periods (seasons/decades). Even though progress has been made, it remains difficult to adequately characterize, monitor, forecast and manage droughts, due to their multi-faceted nature.

Usually, drought does not directly cause fatalities, but a wide range of socio-economic and environmental effects may occur, and, depending on the region, water-and food-related diseases and casualties can be triggered. Europe has regularly been hit hard by drought (e.g. recently Russia), and large portions of USA, Mexico, Brazil, China, India, Central Asia, South Africa, the Great Horn of Africa, or Australia, have been affected by drought. So globally, drought affects more regions, and more people, than other natural hazards.

Additionally, climate change projections for many areas indicate that droughts are likely to become more frequent and more severe due to the increased variability of precipitation and temperature, tied in some cases to decreased average precipitation and increased average temperature. Hence, there is an urgent need to improve drought preparedness through measures that reduce vulnerability to drought and the risks they pose, in particular considering the uncertain future.

Drought. Research and Science Policy Interfacing includes contributions to the International Conference on DROUGHT: Research and Science-Policy Interfacing (Valencia, Spain, 10-13 March 2015), the final event of the EU FP7 research project DROUGHT-R&SPI (Fostering European Drought Research and Science-Policy Interfacing). The book aims to foster development of drought policies and plans to reduce risk and vulnerability, and to enhance preparedness and resilience.

The book addresses the following topics : (1) past, present and future of droughts (natural hazards, identification and characterization, impacts); (2) indicators, monitoring and forecasting (including early warning systems), risk and vulnerability assessment and reduction at different scales, and (3) preparedness and mitigation options (risk and vulnerability perception, water management and governance under drought

conditions, design and implementation of drought policies and plans from the local to the regional, national and international levels, research Interfaces with drought policies).

Drought. Research and Science Policy Interfacing will be of interest to researchers and professionals in those fields related to drought, such as climatology, meteorology, hydrology, agronomy, ecology, water economy, and water management, as well as to policy makers involved in drought preparedness and mitigation strategies at local, regional, national and international levels.

From reader reviews:

Andre Rosier:

Nowadays reading books be than want or need but also turn into a life style. This reading addiction give you lot of advantages. Advantages you got of course the knowledge even the information inside the book that improve your knowledge and information. The info you get based on what kind of e-book you read, if you want have more knowledge just go with education books but if you want truly feel happy read one using theme for entertaining including comic or novel. The particular Drought: Research and Science-Policy Interfacing is kind of guide which is giving the reader capricious experience.

Lisa Martin:

Reading can called thoughts hangout, why? Because if you are reading a book especially book entitled Drought: Research and Science-Policy Interfacing your mind will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely will end up your mind friends. Imaging every word written in a book then become one type conclusion and explanation this maybe you never get before. The Drought: Research and Science-Policy Interfacing giving you one more experience more than blown away your brain but also giving you useful details for your better life on this era. So now let us demonstrate the relaxing pattern at this point is your body and mind will be pleased when you are finished studying it, like winning a sport. Do you want to try this extraordinary spending spare time activity?

Bruce Sandlin:

You may get this Drought: Research and Science-Policy Interfacing by visit the bookstore or Mall. Merely viewing or reviewing it could to be your solve issue if you get difficulties on your knowledge. Kinds of this guide are various. Not only by means of written or printed but additionally can you enjoy this book by e-book. In the modern era such as now, you just looking by your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose proper ways for you.

Oliver Whitley:

Publication is one of source of know-how. We can add our information from it. Not only for students but in addition native or citizen have to have book to know the up-date information of year to help year. As we know those books have many advantages. Beside we add our knowledge, can also bring us to around the world. By the book Drought: Research and Science-Policy Interfacing we can take more advantage. Don't that you be creative people? To get creative person must love to read a book. Simply choose the best book that appropriate with your aim. Don't possibly be doubt to change your life with this book Drought: Research and Science-Policy Interfacing. You can more inviting than now.
