Early Childhood Mathematics Education Research: Learning Trajectories for Young Children (Studies in Mathematical Thinking and Learning Series) Julie Sarama, Douglas H. Clements

This important new book synthesizes relevant research on the learning of mathematics from birth into the primary grades from the full range of these complementary perspectives. At the core of early math experts Julie Sarama and Douglas Clements's theoretical and empirical frameworks are learning trajectories—detailed descriptions of children's thinking as they learn to achieve specific goals in a mathematical domain, alongside a related set of instructional tasks designed to engender those mental processes and move children through a developmental progression of levels of thinking. Rooted in basic issues of thinking, learning, and teaching, this groundbreaking body of research illuminates foundational topics on the learning of mathematics with practical and theoretical implications for all ages. Those implications are especially important in addressing equity concerns, as understanding the level of thinking of the class and the individuals within it, is key in serving the needs of all children.

From reader reviews:

Ariane Gray:

Book is to be different for each grade. Book for children until finally adult are different content. As we know that book is very important for people. The book Early Childhood Mathematics Education Research: Learning Trajectories for Young Children (Studies in Mathematical Thinking and Learning Series) ended up being making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The publication Early Childhood Mathematics Education Research: Learning Trajectories for Young Children (Studies in Mathematical Thinking and Learning Series) is not only giving you a lot more new information but also for being your friend when you really feel bored. You can spend your own spend time to read your guide. Try to make relationship with the book Early Childhood Mathematics Education Research: Learning Trajectories for Young Children (Studies in Mathematical Thinking and Learning Series). You never really feel lose out for everything when you read some books.

Ryan Parker:

As people who live in the modest era should be upgrade about what going on or data even knowledge to make all of them keep up with the era and that is always change and make progress. Some of you maybe will probably update themselves by studying books. It is a good choice for you personally but the problems coming to anyone is you don't know what one you should start with. This Early Childhood Mathematics Education Research: Learning Trajectories for Young Children (Studies in Mathematical Thinking and Learning Series) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and need in this era.

Shirley Nichols:

Reading can called mind hangout, why? Because if you find yourself reading a book particularly book entitled Early Childhood Mathematics Education Research: Learning Trajectories for Young Children (Studies in Mathematical Thinking and Learning Series) your head will drift away trough every dimension, wandering in most aspect that maybe not known for but surely will end up your mind friends. Imaging each word written in a book then become one form conclusion and explanation which maybe you never get just before. The Early Childhood Mathematics Education Research: Learning Trajectories for Young Children (Studies in Mathematical Thinking and Learning Series) giving you one more experience more than blown away your brain but also giving you useful info for your better life in this era. So now let us demonstrate the relaxing pattern at this point is your body and mind is going to be pleased when you are finished studying it, like winning a sport. Do you want to try this extraordinary shelling out spare time activity?

Jessica Palmer:

In this particular era which is the greater man or who has ability in doing something more are more special

than other. Do you want to become one among it? It is just simple solution to have that. What you need to do is just spending your time little but quite enough to have a look at some books. On the list of books in the top record in your reading list is Early Childhood Mathematics Education Research: Learning Trajectories for Young Children (Studies in Mathematical Thinking and Learning Series). This book which can be qualified as The Hungry Hillside can get you closer in becoming precious person. By looking up and review this e-book you can get many advantages.
