Robust Multimodal Cognitive Load Measurement (Human-Computer Interaction Series) Fang Chen, Jianlong Zhou, Yang Wang, Kun Yu, Syed Z. Arshad, Ahmad Khawaji, Dan Conway

This book explores robust multimodal cognitive load measurement with physiological and behavioural modalities, which involve the eye, Galvanic Skin Response, speech, language, pen input, mouse movement and multimodality fusions. Factors including stress, trust, and environmental factors such as illumination are discussed regarding their implications for cognitive load measurement. Furthermore, dynamic workload adjustment and real-time cognitive load measurement with data streaming are presented in order to make cognitive load measurement accessible by more widespread applications and users. Finally, application examples are reviewed demonstrating the feasibility of multimodal cognitive load measurement in practical applications.

This is the first book of its kind to systematically introduce various computational methods for automatic and real-time cognitive load measurement and by doing so moves the practical application of cognitive load measurement from the domain of the computer scientist and psychologist to more general end-users, ready for widespread implementation.

Robust Multimodal Cognitive Load Measurement is intended for researchers and practitioners involved with cognitive load studies and communities within the computer, cognitive, and social sciences. The book will especially benefit researchers in areas like behaviour analysis, social analytics, human-computer interaction (HCI), intelligent information processing, and decision support systems.

From reader reviews:

Aurora Foster:

Do you have favorite book? For those who have, what is your favorite's book? Reserve is very important thing for us to know everything in the world. Each book has different aim or maybe goal; it means that e-book has different type. Some people truly feel enjoy to spend their a chance to read a book. They can be reading whatever they acquire because their hobby is usually reading a book. Consider the person who don't like reading through a book? Sometime, particular person feel need book whenever they found difficult problem or perhaps exercise. Well, probably you will want this Robust Multimodal Cognitive Load Measurement (Human-Computer Interaction Series).

Jennifer Shipley:

What do you with regards to book? It is not important along with you? Or just adding material when you need something to explain what you problem? How about your free time? Or are you busy man? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? All people has many questions above. The doctor has to answer that question since just their can do which. It said that about e-book. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this particular Robust Multimodal Cognitive Load Measurement (Human-Computer Interaction Series) to read.

Rebecca Dryden:

The reserve untitled Robust Multimodal Cognitive Load Measurement (Human-Computer Interaction Series) is the e-book that recommended to you to read. You can see the quality of the guide content that will be shown to an individual. The language that author use to explained their ideas are easily to understand. The writer was did a lot of study when write the book, hence the information that they share to your account is absolutely accurate. You also can get the e-book of Robust Multimodal Cognitive Load Measurement (Human-Computer Interaction Series) from the publisher to make you considerably more enjoy free time.

Carmen Vasquez:

Many people spending their time frame by playing outside using friends, fun activity using family or just watching TV all day every day. You can have new activity to shell out your whole day by studying a book. Ugh, do you consider reading a book will surely hard because you have to use the book everywhere? It all right you can have the e-book, delivering everywhere you want in your Touch screen phone. Like Robust Multimodal Cognitive Load Measurement (Human-Computer Interaction Series) which is keeping the e-book version. So , why not try out this book? Let's see.
