Digital media provide humans with more access to information than ever before—a computer, tablet, or smartphone can all be used to access data online and users frequently have more than one device. However, as humans continue to venture into the digital frontier, it remains to be known whether access to seemingly unlimited information is actually helping us learn and solve complex problems, or ultimately creating more difficulty and confusion for individuals and societies by offering content overload that is not always meaningful.

Throughout history, technology has changed the way humans interact with the world. Improvements in tools, language, industrial machines, and now digital information technology have shaped our minds and societies. There has always been access to more information than humans can handle, but the difference now lies in the ubiquity of the Internet and digital technology, and the incredible speed with which anyone with a computer can access and participate in seemingly infinite information exchange. Humans now live in a world where mobile digital technology is everywhere, from the classroom and the doctor's office to public transportation and even the dinner table. This paradigm shift in technology comes with tremendous benefits and risks. Interdisciplinary Research (IDR) Teams at the 2012 National Academies Keck Futures Initiative Conference on The Informed Brain in the Digital World explored common rewards and dangers to Humans among various fields that are being greatly impacted by the Internet and the rapid evolution of digital technology.

Keynote speaker Clifford Nass of Stanford University opened the dialogue by offering insight into what we already know about how the "information overload" of the digital world may be affecting our brains. Nass presented the idea of the "media budget," which states that when a new media emerges, it takes time away from other media in a daily time budget. When additional media appear and there is no time left in a person's daily media budget, people begin to "double book" media time. Personal computers, tablets, and smartphones make it easy to use several media simultaneously, and according to Nass, this double-booking of media can result in chronic multitasking, which affects how people store and manage memory. Although current fast-paced work and learning environments often encourage multitasking, research shows that such multitasking is inefficient, decreases productivity, and may hinder cognitive function. *National Academies Keck Future Initiative: The Informed Brain in a Digital World* summarizes the happenings of this conference.

### **From reader reviews:**

#### **Jaclyn Utecht:**

Book will be written, printed, or outlined for everything. You can learn everything you want by a e-book. Book has a different type. As you may know that book is important thing to bring us around the world. Beside that you can your reading expertise was fluently. A publication National Academies Keck Future Initiative: The Informed Brain in a Digital World: Interdisciplinary Team Summaries will make you to possibly be smarter. You can feel more confidence if you can know about every thing. But some of you think in which open or reading any book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you in search of best book or suited book with you?

#### **Duncan Houghton:**

What do you regarding book? It is not important along? Or just adding material when you want something to explain what yours problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to do others business, it is make you feel bored faster. And you have extra time? What did you do? Every person has many questions above. They must answer that question mainly because just their can do which. It said that about e-book. Book is familiar on every person. Yes, it is appropriate. Because start from on pre-school until university need this National Academies Keck Future Initiative: The Informed Brain in a Digital World: Interdisciplinary Team Summaries to read.

#### **Robert Frith:**

This National Academies Keck Future Initiative: The Informed Brain in a Digital World: Interdisciplinary Team Summaries are generally reliable for you who want to become a successful person, why. The key reason why of this National Academies Keck Future Initiative: The Informed Brain in a Digital World: Interdisciplinary Team Summaries can be one of the great books you must have is definitely giving you more than just simple reading food but feed you with information that possibly will shock your preceding knowledge. This book is definitely handy, you can bring it everywhere you go and whenever your conditions both in e-book and printed versions. Beside that this National Academies Keck Future Initiative: The Informed Brain in a Digital World: Interdisciplinary Team Summaries giving you an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we understand it useful in your day exercise. So , let's have it and luxuriate in reading.

#### **Luther Jensen:**

This National Academies Keck Future Initiative: The Informed Brain in a Digital World: Interdisciplinary Team Summaries is great guide for you because the content which is full of information for you who also always deal with world and get to make decision every minute. This book reveal it data accurately using great manage word or we can say no rambling sentences within it. So if you are read that hurriedly you can have whole data in it. Doesn't mean it only provides straight forward sentences but hard core information

with splendid delivering sentences. Having National Academies Keck Future Initiative: The Informed Brain in a Digital World: Interdisciplinary Team Summaries in your hand like finding the world in your arm, data in it is not ridiculous just one. We can say that no e-book that offer you world within ten or fifteen small right but this publication already do that. So , this is good reading book. Hey Mr. and Mrs. busy do you still doubt this?
