**UHF RFID Technologies for Identification and Traceability (Focus (Wiley))** Jean-Marc Laheurte

UHF Radio Frequency Identification (RFID) is an electronic tagging technology that allows an object, place or person to be automatically identified at a distance without a direct line-of-sight using a radio wave exchange. Applications include inventory tracking, prescription medication tracking and authentication, secure automobile keys, and access control for secure facilities.

This book begins with an overview of UHF RFID challenges describing the applications, markets, trades and basic technologies. It follows this by highlighting the main features distinguishing UHF (860MHz-960MHz) and HF (125 kHz and 13.56 MHz) identifications, in terms of reading range, environmental sensitivity, throughput and safety. The architecture of the integrated circuits and the organization of the memory are then described. One chapter is devoted to the air interface protocol aspects, including coding, modulation, multi readers operation and anti-collision algorithms to manage the tag responses. Focus will be put upon the EPC Gen2 protocol adopted in the ISO 18000 Part 6.

The core of the book will cover the design and manufacturing issues of RFID tags. The influence of the propagation medium (warehouse, libraries, etc.), the tag close environment (bottles, linens, containers, carton boxes, etc.) and the coupling between tags will also be carefully addressed.

The final chapter is dedicated to an industrial use case in the supply chain management, either in the retail inventory or blood traceability.

### **From reader reviews:**

#### **Marc Gaul:**

People live in this new time of lifestyle always make an effort to and must have the extra time or they will get wide range of stress from both day to day life and work. So , when we ask do people have time, we will say absolutely of course. People is human not just a robot. Then we ask again, what kind of activity do you possess when the spare time coming to an individual of course your answer will unlimited right. Then ever try this one, reading guides. It can be your alternative within spending your spare time, the actual book you have read is usually UHF RFID Technologies for Identification and Traceability (Focus (Wiley)).

#### **Edward Shaw:**

In this particular era which is the greater man or woman or who has ability in doing something more are more treasured than other. Do you want to become considered one of it? It is just simple way to have that. What you must do is just spending your time not very much but quite enough to have a look at some books. One of several books in the top collection in your reading list is actually UHF RFID Technologies for Identification and Traceability (Focus (Wiley)). This book that is certainly qualified as The Hungry Hills can get you closer in turning out to be precious person. By looking way up and review this book you can get many advantages.

#### **Frank Cockerham:**

You can obtain this UHF RFID Technologies for Identification and Traceability (Focus (Wiley)) by check out the bookstore or Mall. Simply viewing or reviewing it can to be your solve challenge if you get difficulties to your knowledge. Kinds of this publication are various. Not only simply by written or printed but additionally can you enjoy this book through e-book. In the modern era such as now, you just looking from your mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose correct ways for you.

#### **Kenneth Allen:**

That publication can make you to feel relax. This book UHF RFID Technologies for Identification and Traceability (Focus (Wiley)) was vibrant and of course has pictures around. As we know that book UHF RFID Technologies for Identification and Traceability (Focus (Wiley)) has many kinds or category. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and feel that you are the character on there. Therefore , not at all of book are generally make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you and try to like reading which.
